

IT'S ABOUT WELLNESS, NOT WAISTLINE

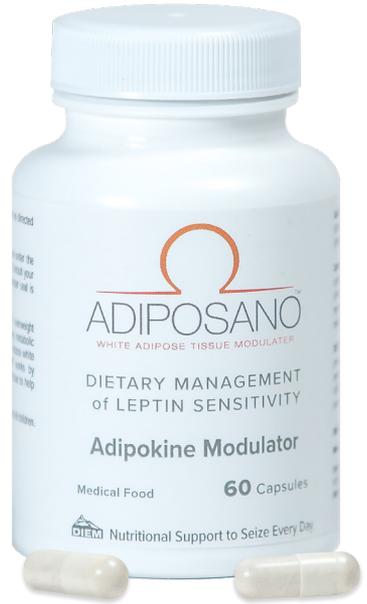

Adiposano® modulates eWATS for metabolic health

Thank you for your order! Your healthcare provider has recommended Adiposano®, and together you've made the right decision for your metabolic health. If you're at risk of developing metabolic syndrome, Adiposano® offers a unique solution to the management of excess white adipose tissue and metabolic health.

**It's not about the size of your waistline.
It's about your total-body wellness.**

Adiposano® is a one-of-a-kind approach to excess white adipose tissue—the fat that acts as an organ, releasing influential hormones called adipokines, which can negatively impact your health and comfort. Through its effects on the form and function of fat cells, Adiposano® supports metabolic health to promote efficient insulin function, healthy leptin sensitivity, strong energy metabolism and even systemic inflammation.

Taking Adiposano® daily can help you feel better while defending against the progression into metabolic syndrome and advanced cardiovascular concerns.

We welcome your questions and comments! Our customer care associates are available to assist you Monday through Friday 8:00am to 4:00pm CST.

Adiposano® is a medical food indicated for overweight or obese individuals (BMI >30) who exhibit characteristics of Excess White Adipose Tissue Syndrome (eWATS).
*Excess White Adipose Tissue Syndrome is a newly proposed designation suggested to identify those in a pre-metabolic-syndrome state who may benefit from early dietary and lifestyle interventions designed to promote metabolic health before it progresses to an acute medical concern.

A Metabolic Modulator for Obese Individuals

▶ White adipose tissue (WAT) acts as an organ, release hormones called adipokines, that can negatively impact health and comfort. Adiposano® works naturally to reduce WAT and modulate adipokine release to defend against advanced metabolic health concerns.

Within 90 Days, Adiposano® has been shown to

Reduces Adipose Tissue^{1,2}

In Vitro and In Vivo studies demonstrate Oralisc® reduces adipogenesis, increases the use of fat as an energy source, reduces body fat, and increases lean body mass.

Regulates Leptin³

A 3-month treatment of Oralisc® could significantly reduce the leptin levels in serum of obese patients better than placebo in a randomized double blind study.

Reduces Systemic Inflammation³

A 3-month treatment of Oralisc® could significantly reduce inflammatory cytokine levels in serum of obese patients better than placebo in a randomized double blind study.

Regulates Metabolic Dysfunction^{2,3}

As shown in a randomized double blind study, a 3-month treatment of Oralisc® could significantly reduce cholesterol and triglyceride levels in obese patients without a lifestyle change. In Vivo studies suggest Oralisc® enhances insulin sensitivity and decreases liver fat accumulation.

▶ Use as directed for metabolic maintenance and weight management

Adiposano® is a safe and effective medical food supplement for metabolic maintenance. Your healthcare provider has recommended Adiposano™ to help you maintain your metabolic health and manage your weight now and into the future.

Diem Labs is committed to your success. We'll be with you every step of the way, ready to serve you with your reorders, question or concerns. Email us anytime at adiposano@diemlabslc.com or call us at **1-800-971-3721** Monday through Friday, 8am to 4pm CST.
